## About This Game

The planet is being attacked and it will take a bodaciously bad-ass cursor pilot to blast the scum to whence it came! Dodge, dip, duck, click and point your way to glory in the most gnarly retro-arcade death trap that you are likely to ever play! Point Perfect will put that "I'm a real PC gamer" attitude to the ultimate test and might make you cry a little in the process. But fear not young pilot, because with great challenge comes even greater glory and nerdy bragging rights! For a select few it will even mean graduating from the prestigious Point Perfect University of Aeronautics. Which of course includes a printable diploma that you can hang on your wall to make Mom proud!

## Features

It's fun! I just don't like having to close and reopen the game whenever I come back from AFK.. Really love the writing here, I can see where they got the whole Fate/stay night inspiration, yet remain its own original. Apparently this is but one of five VN by the same writer. The Masadaverse is a series of visual novels written and done by Takashi Masada. There are a total of five games written by him: Paradise Lost(The poster on the wall in Rin Fuji's room on the right), Dies Irae, Kajiri Kamui Kagura, Soushuu Senshinkan Gakuen Hachimyoujin and Soushuu Senshinkan Gakuen Bansenjin, with the recent addition of Dies Irae-Interview with Kaziklu Bey. The first three, plus "IKaBey" (a canon prequel to the main storyline of Dies Irae), are part of the Shinza Banshou series (previously known as Kami-Sama series).

Now I'm really hoping steam brings over the Fate VNs and The Masadaverse VNs.. Do not buy this for any reason. The audio is desynced! HOW DO YOU SELL A VIDEO IF THE AUDIO SKIPS AROUND? The video looks grainy and the color is messed up. Looks like a VHS rip.. Something like League of Legends V Overwatch only in 2D

Worth 10\$ for sure. This game is ok. it's kinda boring but it beats nothing.. Simple Puzzle Mechanics? Yes. Simple Solutions? No.

It's certainly a challenging game, but after putting the same set of moves in over and over expecting a different result, you feel compelled to just throw your computer across the room and curse every puzzle game you've ever played.. Great graphics, sweet sound design, and a cool gameplay even though the controls are quite simple (in fact you can play both players at one time, even though it becomes quite hard... your choice).

Red Rope is a fantastic game, a little gem.

this game is amazing but say no to microtransactions. I got this for pre order. I won't get for any more though.. This is a game that i am going to rate a 6/10 as this is going to be something that i can go on now and then and play the game but it's something that if you have to go out soon or something, you are able to play a couple of level great game and amazing for the achievements.. <http://youtu.be/YQbJ7hMIGIM>

I played Bad Bots for only 20 minutes or so (not because I don't like the game).

As advertised you are pitted against a lot of bad robots in a big space ship.

Game looks good (It's meant to be 'retro'). Reminds me most of Bio-Menace (1993) and a few other old games.

I encountered some minor issues. It was a bit tricky to shoot over cover (but cool that you and the robots could duck behind it!). I found that occasionally my equipped weapon randomly changes (when I change and then jump straight away?). I sometimes found it hard to get off ladders unable to defend and avoid enemy attacks. The boss fight that I encountered could have been better I couldn't see a way to get out of the boss's path (i.e. grab a handhold and hang from the roof above it or something). Basically the battle boiled down to it semi-stun locking me and having to out damage it.

However I enjoyed the game so far. It has a story with cut-scenes in a comic book style (sort of like in the original X-Com). It wasn't so retro that you couldn't aim with the mouse. The Sci-fi space ship environment music were cool. Crawling through service ducts are a nice addition to the corridors and rooms. Remains of the brutally murdered crew scattered throughout the ship added to the atmosphere.

It is probably (I say probably because I haven't play the whole game) worth it's \$1.99 price tag on steam. At the moment it is only \$0.49 which is the price I got it for and it was worth it even just for the short time that I played.

Click [here](#) for more let's play videos =). I cannot recommend a game where the developers are very lazy and break the game. Instead of fixing what they break, they end up telling the people who bought the game that it has to be there internet connection and that's why it isn't working like it was before there update which broke the game in the first place. Stay clear of this game, find another game with actual smart developers instead of these half educated poor excuses for developers. Buyer beware, company and developers that don't actually test there updates that break the game for people and then blame those people that actually put money into this game made by half educated monkeys picking each others asses instead of fixing what they broke. Note to the developers, fix your dam game and don't blame your player base for you breaking your own game, how dumb are you people?. this game looks like a amateur game developer's first project and as if it was made in 1980's. i shocked when i learned this game actually was made in 2012. it looks so old and ugly. gameplay is also not enjoyable and background music is annoying.
