About This Game

Aliens have waged wars countless of times in our history but nothing quite like this. They've never been this close to winning much less taking over all of humanity.

This time it's quite different, our skies have turned red as our forces battle with the aliens in a final showdown over the planet. And it does seem the aliens have won the battle of the skies and things look bleak for humanity.

And even now, aliens are dropping from their flagships on to the earth's surface in a final bid to take over the planet and enslave humanity and it is now up to our ground forces to make sure that does not happen. You are our greatest warrior and our greatest hope for survival. The whole of mankind is dependent on the mission that you will now execute, that is to blast all aliens dropping in from the skies and prevent them from reaching the earth's surface.

You and other warriors have intel about the entry points where the aliens flagships are positioned and where they will try to drop to the earth from the skies to form initial colonies.

Your mission, blast away all aliens dropping from the skies, and prevent them from reaching the planet's surface.

Repel Aliens 3D is designed as a lightweight title, suitable for all ages and can be played on any PC, it runs on minimum memory making it ideal for lightweight PCs.

Title: Repel Aliens 3D
Genre: Indie

repel aliens 3d

Great game to learn guitar whilst having fun in the process.. I have a nice HOTAS set up.
This game doesn't care about my HOTAS set up.

This game has no control options to assign controls for my HOTAS.

The pilot is left handed. There are no options to switch to right to maximize immersion. (This is more important if there was HOTAS support to be honest)

With a look and click interface this game was designed for phones.

Im sure it's a nice experience for those who bought expensive VR sets that want that "Cell Phone VR experience"

There is no reset view button. If there is I can't find it because there are no control options to find which button resets your view. Probably because they assumed you are using a phone.

It would have been a good flying experience when demoing the Vive for my guests. But when they see the HOTAS set up and I hand them an xBox controller the response is "meh" in comparison to the other VR FLYING games on Steam that support HOTAS.

I know you think I'm being harsh for a game that is \$10. But I would have paid \$15 for HOTAS support. VR begs for full immersion. I'm no dev so mabey adding options and support for popular HOTAS peripherals costs Thousands of dollars to implement.. Hey, I'll play with you some other time!. It Is a great little game and the Dev seems active. Would recommend if you like these sort of games!. pretty nais. Could be awesome but is currently an unplayable mess. Even if you connect to a server chances are big it doesn't actually put you in a game that actually starts and puts you in the game world. When it does put you in the game world chances are still 50/50 that you'll actually be able to play the game as intended instead of being blocked by one of the many bugs. Thus currently it's absolutely not recommended. Landfall had better first made it copleately playable and then launched it with a price tag instead of for free.. Not worth your time or money.

Three hours of reading/watching to complete both a male and female playthrough. The art is good and there's a lot more to the story than you get in some other VNs (read: many Sakura titles).

With the free patch, the scenes just before the epilogue contain explicit language, but the CGs are not H. (yes, rated R, but not H)

Considering the cost of a single manga volume, this price wasn't bad considering three hours of entertainment.

. I need help! I think there is a bug in the beginning of the game. No menu choice comes up when I greet the Trick or Treaters and the game freezes.

leah919. Vindictive Drive is a thriller/action game with cyberpunk elements.

The story follows Arris Fern, a 22 year old woman who is lost in her desire for revenge against her father, the president of the most powerful nation, for the assassination of her mother 12 years ago.

Completely consumed by hatred, Arris will make friends and strategic contacts to achieve her goal, however, some of them may become the toughest obstacles.

Her cold blooded rampage is interrupted by the sudden appearance of someone important, will this event affect her revenge?

Planned features:

- Vindictive Drive's "battle system" will rely on outsmarting security systems, avoiding cameras, and fooling your enemies using your computer and jamming devices, leaving the pistol as last resort.
- Stealth will be an important part of the game, you will be able to disable alarms and create distractions.
- Story rich scenarios and suspense.
- Talkative and friendly NPCs.
- A lot of illustrations.
- Arris' sour behavior.
- Multiple endings.. I want to like this game, but the interface is really annoying and hard to play. Also, all text is blurry on a high resolution screen.. well, before there are enough players to host servers across the world, most of the playing experiences will be expected to come with some gamebreaking ping issue the game itself is decent, though.
