richie: well that was a lot of fun :-> urthmover: :D urthmover: You did not mention who you are :D and i really hope these geeks on their twitter accounts who like to make fun of people are actually just kiddies who don't know any better and have no impact on the world whatsoever qin: I know who I am...I hope that it wasn't a waste of your time urthmover, I appreciate your friendliness and patience. But this is not the place for of discussion. This is ubuntu support, other discussion is in #ubuntu-offtopic qin: I'm just trying to test out the new irssi irc client urthmover: Ok, good, just a bit over the top. qin: I would like to be sure that irssi is very different from weechat. I would like to be able to switch easily urthmover use hexchat urthmover: then use bitchx qin: also I like the way you just click on the reply button to reply to the entire channel urthmover: then use xchat MonkeyDust: good call and switch now urthmover: I suggest using many irssi-scripts, like irc.freenode.net/join to auto-join channel urthmover: I don't know weechat, but I liked irssi from the beginning, hence the name qin: I don't have to use any scripts to use irssi? how was weechat called? i don't remember my best suggestion is to read the irssi docs and do some exploring MonkeyDust: was the name of my ex gf :p MonkeyDust 82157476af
